

NOT JUST ANY BANNER.

HERE IS WHAT GOES INTO EXPANDBRAND'S ORIGINAL **FLYING BANNER**™

Fabric:

- Washable Fabric – Woven polyester coated with proprietary acrylic coating for optimum print image enhancement and UV stability.
- Fabric banding with triple reinforced end for additional durability.
- Poles are inserted into the fabric band, keeping the skin taught and reducing flapping
- True double sided – Two (not 3) layers of fabric that have been specially treated to make them truly opaque.

Hardware:

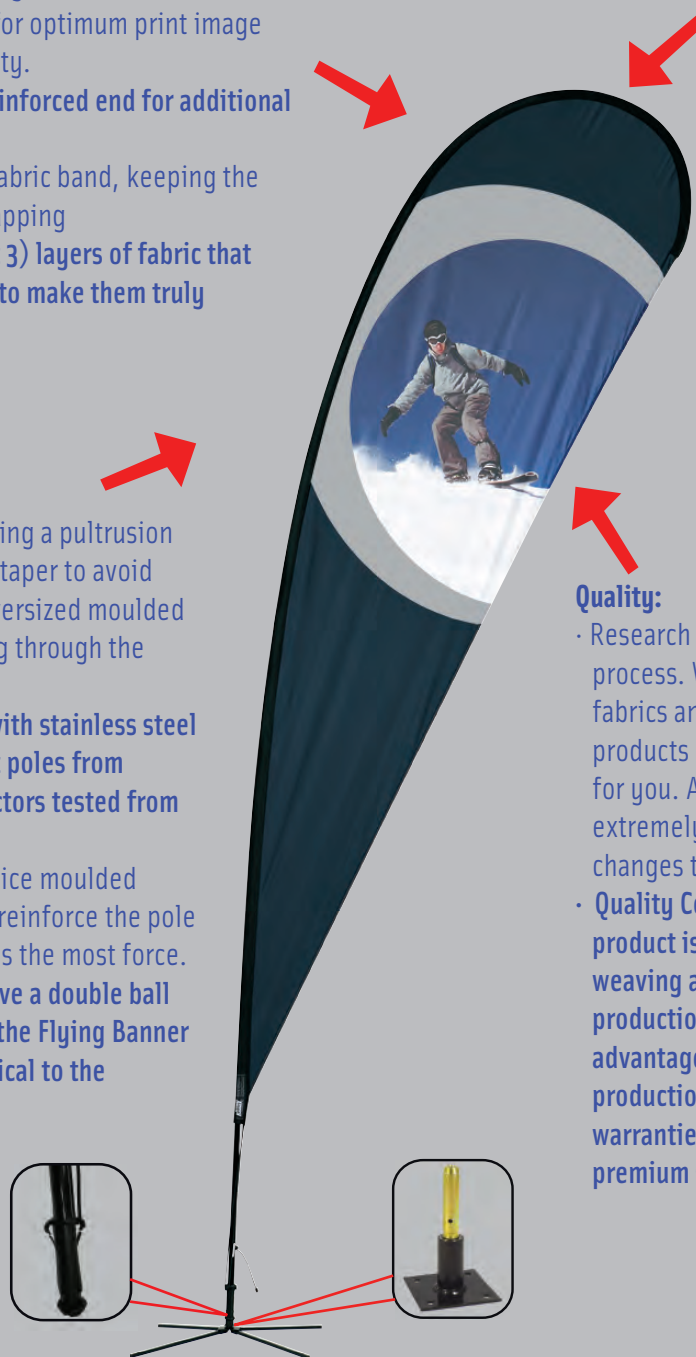

- Solid top rod – produced using a pultrusion technique to provide a true taper to avoid breakages. Also includes oversized moulded tip cover to prevent chaffing through the band.
- High Flex fibreglass rods – with stainless steel reinforcing collar to prevent poles from splitting. Reinforced connectors tested from -35 to 50 degrees Celsius.
- Patented Quick Connect Device moulded to base of fibreglass rod to reinforce the pole at the point that experiences the most force.
- All our mounting options have a double ball bearing spindle that allows the Flying Banner to rotate freely which is critical to the longevity of the Banners.

Printing:

- Printing technologies are rapidly evolving and changing. We keep track with the latest developments and pick technologies that will offer the best and most durable finished products.
- Textiles are direct printed to achieve colour fastness.

Quality:

- Research and Development is an ongoing process. With all new technologies, inks, fabrics and manufacturing process, we test our products extensively before producing them for you. A minimum of 2-3 months testing in extremely harsh conditions is standard for any changes that we make to our Flying Banners.
- **Quality Control:** As the majority of each product is produced within our factory, from weaving and finishing of the fabric, hardware production and printing, we have the advantage of quality checking all stages of production. We back this up with our extensive warranties so you can be assured that a premium standard will always be supplied.

WE ARE THE FLYING BANNER!

A word from Quiksilver Australia:

"Quiksilver have been working with Expandabrand for many years. At one stage we did try another supplier but could not get the quality and consistence of product that Expandabrand have to offer. We are now back with Expandabrand and are extremely happy with their Flying (teardrop) Banners and I regard them as the best in the business."
